

GAME RULES

Fit all of the puzzle pieces on the game board so that the 4 Penguins are placed together in a horizontal, vertical or diagonal line.

- 1** To set up the game place the 2 empty puzzle pieces on the grid as indicated in the selected challenge. These pieces cannot be moved. The early challenges also show the position of some puzzle pieces with penguins, making the solution easier to find.
- 2** Attempt to fit the remaining puzzle pieces with penguins on the game board as follows:
 - The 4 penguins must be placed in a direct horizontal, vertical or diagonal line, next to each other, without any empty squares between them.
 - The 4 penguins must be upright, with their feet at the bottom.
 - The puzzle pieces cannot overlap each other or the border.
- 3** There is only 1 solution, found in the back of the included challenge booklet.
